Why is there a problem when we pay for this service? We should be able to have what ever we pay for. This service on the weather and road conditions is a safety factor. When we get information before hand we can redirect our route to keep the public and us both safe. Nap has no business trying to change something we pay for.

They are not concerned about public safety or the consumer because if they were they would have this information on the radio and up to date at a touch a long time ago. Please tell them they should fix their own problems and leave us alone. Thank You
